SUBJECT:—Terms and conditions governing the issuance of import licences, financed under International Development Association credits—78IN, 92IN and 97IN.

No. 63-ITC(PN)/68.—Attention of the importing firms holding I.D.A. licences is invited to Ministry of Commerce Public Notice No. 28-ITC(PN)/67, dated 21st March, 1967, setting out the terms and conditions governing the issuance of import licences under 4th I.D.A. credit No. 97IN. The same terms and conditions were applicable to and attached with the licences issued earlier under I.D.A. credits No. 78IN and 92IN.

2. In accordance with the said conditions, single payments exceeding \$30,000 equivalent in value, are required to be made through the I.D.A. under the "Direct Payment Procedure", and not by remittance through normal banking channel. The only exception is in the case of Non-ferrous metals imports, where the importing firms have the option to use direct payment procedure or re-imbursement procedure in respect of single payments exceeding \$ 30,000.

3. It has been decided, that with effect from 1st May, 1968, purely as a temporary measure and until further orders, the importing firms will be permitted to use re-imbursement procedure in all cases, even in respect of single payments exceeding \$ 30,000. The licensing conditions may be deemed to have been modified to this extent.

4. The authorised dealers in foreign exchange have been separately instructed to arrange payments in above types of cases by remittances through normal banking channels, and follow the same procedure regarding payments and documentations etc. as is being followed in respect of payments below \$ 30,000.

SUBJECT:—Import of radio components by S.S.I. units—April 1967–March, 1968 period.

No. 64-ITC(PN)/68.—Attention is invited to the Ministry of Commerce Public Notice No. 168-ITC(PN)/67, dated the 16th November, 1967 in terms of which S.S.I. units engaged in the manufacture of valve type radio receivers, transistor radio receivers, amplifiers and car radios are allowed to import certain components upto specified value limits within the face value of the licences granted to them for the period April 1967–March 1968.

2. In accordance with the policy in force, the import entitlement of actual users have been split up for the purpose of issuing licences against free foreign exchange, Rupee Payment, West German Credit and U.S. Aid. The items allowed for import against each of these licences issued to a unit are the same. These

items bear face value restrictions in relation to the value of the licences to the extent indicated in the aforesaid Public Notice. It has been represented that such face value restrictions result in the same item being imported in small and uneconomical value separately against each of the licences issued to a unit for the reason that the item in question appears with its face value restriction in the list attached to each licence.

3. The matter has been considered. If an actual user proposes to arrange his imports against the licences issued to him in respect of various modes of financing, in such a way that the import of a particular item covered by these licences is effected only against one of these licences, he will be allowed to do so, and the licensing authorities will endorse the licences accordingly, on request. Such endorsements will enable the licensee to import a particular item covered by his licence against one of these licences provided the import of the item in question does not exceed the total value earmarked for that item in all the licences. While allowing such endorsements for import of a particular item against one of the licences, the item in question will be deleted from the other licences.

P. D. KASBEKAR,
Chief Controller of Imports and Exports.
